

The Worst Offenders

A list of 200 fossil fuel companies can be found at <http://gofossilfree.org/companies/> with thanks to 350.org's Fossil Free campaign.

But we at Fossil Free Friends believe that there are more companies that belong on the list. There are many companies whose only function is to provide services to fossil fuel companies or to manufacture products that are used in some aspect of fossil fuel production. While we recognize that fossil fuels are integrated into our lives in myriad ways, and that truly ridding ourselves of any investment that had any connection in some way to fossil fuel use is virtually impossible at this time, we do feel that profiting from any company whose sole mission is based on fossil fuel production or distribution is inconsistent with Quaker principles.

So, what companies do we add to the list?

- Core Laboratories
- SeaDrill
- Halliburton
- Schlumberger
- Weatherford
